**AMFIL TECHNOLOGIES COMPLETES INSTALLATION & COMMISSIONING OF
ELEPHANT ODYSSEY AND JAGUAR EXHIBITS AT THE SAN DIEGO ZOO**

San Luis Obispo, California, September 01, 2009 – AMFIL Technologies, Inc. has completed its installation and commissioning of two mPact-LS (Life Support) systems for the Elephant Odyssey and Jaguar Exhibits at the San Diego Zoo.

AMFIL's mPact-LS ozone systems are now being used to antimicrobially treat lagoon waters in the San Diego Zoo's new Elephant Odyssey and Jaguar Exhibits. Two mPact-LS systems, based on AMFIL's extensively proven **mPact™** food and beverage ozone cleaning and antimicrobial treatment systems, treat zoological and aquarium water features with technologically advanced, efficacious, and reliable ozone system design.

Matt Lowe, Vice President of AMFIL Technologies, stated after commissioning that "We are excited to announce that the mPact-LS systems are installed and performing splendidly. The project was quite complex as the control and monitoring systems required for the mPact systems were also integrated into the zoo's primary water feature controls systems. With our redundant safety monitoring and ozone destruct systems in place, the new mPact systems are very safe for both the animals and visitors to the exhibits." Mr Lowe also stated "we look forward to additional projects of this nature as the system technology is so similar to our widely installed base of food and beverage antimicrobial systems."

For 20 plus years, Ozone antimicrobial technology has been used worldwide in zoos and aquariums as a chemical alternative for treating bacterial contaminants commonly found in animal exhibit waters.

ABOUT AMFIL Technologies, Inc. – AMFIL is the manufacturer of cold water ozone-powered cleaning and antimicrobial systems for zoological life support facilities/fish farming, food/food processing equipment, gaseous ozone fumigation systems for produce cold storage and refrigerated transport containers. AMFIL’s products include the mobile **mPact-5** and **mPact-10** systems, the **mPact-25**, **mPact-45S**, **mPact-250S**, and **mPact-500S** centralized systems, **mPact-CSF** cold storage fumigation system, and **mPact-RCF** refrigerated container fumigation system. In addition, AMFIL manufactures the **mPact-CAS**, a system designed specifically for cased meat log cleaning & antimicrobial treatment. Please visit www.amfiltech.com for additional information on **mPact™** systems.
