

**FOR IMMEDIATE RELEASE:**

**AMFIL Technologies Receives Purchase Order Inquiry Valued Between \$2 Million to \$3 Million From Leading North American Bottled Water Processor**

8:01a ET June 30, 2010 (Market Wire)

AMFIL Technologies, Inc. (PINKSHEETS: AMFE) is pleased to announce they have received a purchase order inquiry valued between \$2 million to \$3 million from a leading North American bottled water processor. This leading company is seeking AMFIL's technology for use on multiple facilities.

The inquiry follows over three years of successful mPact cleaning antimicrobial system applications at two of their California bottling facilities. The systems, being used to replace chlorine use, have proven to provide better, and more consistent, sanitation in the bottling environment compared to conventionally used chlorine.

Ambrose Fillis, President and CEO of AMFIL Technologies, states, "We are pleased to receive a purchase order inquiry of this size from our existing client. This is part of a growing trend around the world toward the use of non-chemical based sanitation measures for facilities. We anticipate orders to continue to rise worldwide due to increased government regulations and increased awareness of environmentally friendly cold water ozone-powered cleaning and antimicrobial systems."

For more information, please contact Investor Relations at (973) 351-3868 or visit the company website directly: [www.amfiltech.com](http://www.amfiltech.com).
